DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The disclosure is objected to because of the following informalities: preceding line 1 on page 1, applicant must list all related applications and PCT data.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 2, line 4, the term “whereby” is unclear because it has been held that the functional “whereby” statement does not define any structure and accordingly can not serve to distinguish. *In re Mason*, 114 USPQ 127, 44 CCPA 937 (1957). In line 4, there is no antecedent basis for “a first part of the housing.” In lines 6-7, there is no antecedent basis for “a second housing

part.” In line 8, applicant should clarify the structure that is intended by “pressure-resistant encapsulation.”

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 2, as best able to be understood in view of the rejections under 35 U.S.C. 112, second paragraph, is rejected under 35 U.S.C. 102(b) as being anticipated by DE 2926549.

DE 2926549 discloses a valve solenoid comprising:

- a housing [1] having first and second parts [figure 1];
- a coil [23];
- an iron circuit [13];
- a casing compound [4, 22] introduced into the first part of the housing embedding the iron circuit and coil; and
- connection elements [31, 31] arranged in the second housing part, wherein the second housing part is “configured to resist explosion pressure in case of an internal explosion and prevents transmission of the explosion to the environment.”

Art Unit: 2832

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Cook et al. [US 6,374,814] and Hoffman et al. [US 3,692,520].
